

AMDEBIRHAN BISHU

FULL-STACK & MOBILE SOFTWARE ENGINEER

Chicago, IL 60640 | amde.kbishu@gmail.com | LinkedIn | GitHub

SUMMARY

Product-minded full-stack and mobile software engineer building end-to-end applications with React Native, React, Node.js, Express, and PostgreSQL. Experienced in AI integration, long-running media workflows, REST API design, cloud deployment, automated testing, and user-centered product development across healthcare, consumer AI, and analytics products.

TECHNICAL SKILLS

Languages: JavaScript, SQL, Python

Mobile & Frontend: React Native, Expo, EAS, React, Material UI, HTML5, CSS3, responsive design

Backend & Data: Node.js, Express, REST APIs, PostgreSQL, Supabase, SQLite, Sequelize, authentication and authorization

AI & Cloud: OpenAI API, structured AI responses, image-generation workflows, prompt design, Cloudinary, Render, Microsoft Azure

Engineering: Git, GitHub, automated testing, CI/CD, API integration, Agile product development

EXPERIENCE

Independent Software Engineer | Chicago, IL

2022–Present

- Designed and built end-to-end mobile and web products across healthcare coordination, generative imaging, and sports analytics using React Native, React, Node.js, Express, and PostgreSQL.
- Developed REST APIs, relational data models, ownership boundaries, validation, state synchronization, and recovery flows for user-facing applications.
- Integrated OpenAI text and image capabilities with structured outputs, provider abstraction, managed media storage, and product-facing error handling.
- Deployed backend services to Render and built mobile release workflows with Expo and EAS.
- Created automated tests and operational checks around background jobs, purchases, caching, request context, and result recovery.

SELECTED PROJECTS

DoseBridge — Medication-First Care Coordination

[Engineering case study](#)

- Built an Expo and React Native application for medication schedules, reminders, shared care spaces, meal support, grocery workflows, and safety-aware AI guidance.
- Developed a Node.js, Express, and PostgreSQL backend with validation, ownership checks, request context, and synchronized caregiver state; deployed the API to Render.

StyleMirror — AI Hairstyle Discovery

[Engineering case study](#)

- Created a mobile-first hairstyle discovery experience covering photo guidance, AI generation, durable job recovery, result comparison, cultural collections, and salon-ready briefs.
- Integrated OpenAI image workflows and managed media delivery; built entitlement, purchase, caching, telemetry, and recovery logic supported by 32 focused test files.

SportyfiAI / GameLensAI — Explainable Sports Analytics

[Engineering case study](#)

- Built a responsive React and Node.js analytics platform with match boards, explainable predictions, line shopping, position tracking, alerts, and historical performance analysis.
- Designed PostgreSQL-backed odds snapshots and reporting that distinguish prediction hit rate, tracked ROI, closing-line performance, lineup state, and sample quality.

EDUCATION & TRAINING

Certificate in Web Development, Harold Washington College — 2021 | **Certificate in Computer Information Systems**, Truman College — 2019

Full-Stack Web Development Bootcamp, W3Schools — 2023 | **Programming for Everybody (Python)**, Coursera
